About Centricity Systems

Centricity Systems is an independent consulting firm specializing in helping clients in the effective use of Process and Information technology to solve complex problems, improve operations, and implement streamlined efficiencies in a cost-conscious manner.

The company was founded in 2002 from a long and successful list of experiences spanning 25 years helping companies define, implement, and manage solutions and services that drive business efficiency, high-performance, and shareholder value.

Centricity Systems offers a unique combination of deep industry expertise and broad business operations know-how to offer unparalleled experience and perspective in executing and delivering the highest value and return for clients on every engagement.

The fact that clients continually re-engage Centricity Systems for further services is testament to the quality and value that is always delivered.

Business Process

Centricity Systems understands the importance of good process design and implementation as well as how critical it is for people to be able to work efficiently with it. We can help you rapidly analyze, design, and solve even your most complex problems in a cost-conscious manner to achieve success, adoption, and high-performance results with your next initiative.

CRM, ERP, and Information Management

With over 25 years of experience in customer information systems and knowledge management, we are uniquely qualified to help you achieve success on your next CRM, ERP, or information management initiative. From strategy and executive buy-in, to evaluation, design, process alignment, training, and support, we offer full turnkey services and consulting that complements your existing team, to ensure rapid results.

NetSuite Consulting Services

Savvy companies realize that proper planning and execution are paramount to achieving long term success with NetSuite. Centricity Systems offers services to help companies avoid the complexities and successfully plan, deploy, train, customize, and support NetSuite to gain long-term value and benefits that might not otherwise be possible. From full-scale implementation management to services that complement your in-house skills, we can provide the right level of expertise to match your needs.

Services Management

Today's companies face many complex challenges when defining a Support or Services strategy or infrastructure plan. Centricity Systems understands Services and can assess your current organization's performance and practices, build out necessary infrastructure and staff, and help you leverage your Services and Support organizations to become significant contributors to business profitability.

Web/Portal/Commerce Enablement

Your online presence is often the first image customers and prospects develop of who you are as a company. How you represent yourself online can often be the critical difference between doing business with someone or not. Centricity Systems offers strategy, development, and content management expertise to help you deliver a rich Internet presence and superior online experience for your customers and partners.

Interim Management

Companies often struggle with the dilemma between finding talent to fill key roles and the need for experienced individuals to execute immediate objectives. To bridge the gap, Centricity Systems offers Interim Management services allowing companies to gain immediate senior-level leadership and expertise to address near-term needs while they work to fill roles with permanent staff.
